The Denison's barb is Endangered and desperately needs your help

*Sahyadria denisonii*

Denise is the popular aquarium fish, the Denison's barb. **Donate** today to help **conserve** the **Endangered** species in the wild: [shoalconservation.org/sos/#denise](http://shoalconservation.org/sos/#denise)

**NAMES:** Denison's barb, red line torpedo barb, Miss Kerala, roseline shark.

**RANGE:** Fragmented areas in the Western Ghats biodiversity hotspot, India.

**THREATS:** Habitat loss, pollution, sand-mining, historic fishing practices.

**CONSERVATION STATUS:** Endangered.

Although it is now illegal to trade the barb in India, populations have been severely impacted by anthropogenic threats. The species could face extinction in the wild without urgent conservation action.

SHOAL is a programme of Synchronicity Earth and Rewild. Synchronicity Earth is a charity registered in the UK and Wales No: 1132786 and a company limited by guarantee No: 06952204. Rewild is a registered U.S. 501(c)(3) public charity (Tax ID 26-2887967).
